

**The President's Secret Garden (Malta)** is a weekly event that takes place in the garden of the President of Malta. The project aims at bringing drama, dance, music, art, food preparation, health and storytelling closer to children (8- to 13-year-olds). During the event, migrant children, children from refugee families and other children deprived of access to such events mingle with students from higher socio-economic backgrounds and work together in different workshops. Based on the experience of students from different social backgrounds, diverse cultural expressions are formed and combined during the events.
